

In The Name Of God

The center of mechanical engineering graduates and professors "Kadman" is a glorious gathering of engineering elders and veterans, which is the result and extract of more than 90 years of continuous activity and effect of the faculty of mechanical engineering of Iran University of Science and Technology.

This center started its activities on October 8, 2014 with a gathering of professors and scholars who are pioneers of contemporary technical and engineering activities, and their role in the industrial development process of contemporary Iran is unmistakable.

By God's grace, the formation of the Center of Mechanical Engineering Graduates and Professors is the vanguard of a national movement in which a large number of managers, engineers, entrepreneurs, industrialists and professors of the Faculty of Mechanical Engineering participate, and a large number of great people of knowledge and technology of the country to start, have contributed to the establishment and support of this great movement. We firmly believe that at the current time when Iran's industry and economy is on the threshold of prosperity in various fields, with planning, organization and coherent management, it is possible to achieve greater synergy and benefit from all the capacities and opportunities ahead. Ahsan provided.

Faculty of Mechanical Engineering is a pole of knowledge and technology production at the national and global level and its graduates have a special place in the industry and economy and knowledge-based authority of Iran today. The close and purposeful connection of this group will be the source of countless blessings and blessings for the rapid movement towards the realization of the main goals of the center, including the following goals:

- . Improving the level of knowledge-based and technological activities through effective and continuous communication between the university and the alumni network and industrial centers related to them
- . Establishing a permanent and capable headquarters to establish industrial connections between the university network and the industry
- . Taking advantage of the experiences of graduates to improve educational and research activities in the faculty
- . Creating organized communication to form and develop fellow members and exchange the needs, opportunities and scientific and technical and research capacities of different departments inside and outside the country to the above network.
- . Designing and examining the issues and problems of the country in order to achieve appropriate solutions for decision-making and providing expert opinions to various executive and legislative institutions, the intellectual, spiritual and material support of the graduates and professors has been a guarantee of the continuation of the weighty and fruitful movement of the center. Its effective continuation depends on the protection of the fundamental values around which the existence of the center as a non-political and non-profit organization is enriched.

These fundamental values and professional requirements, in addition to general ethical and legal considerations, include a set of ethical principles and standards of professional conduct, and their protection requires a special mechanism, and compliance with them will preserve health. and excellence and continuity of the center's activities.

Some ethical principles and standards of professional behavior that should be considered in Kadman include the following:

A) Professional ethical principles:

- . Honesty, trustworthiness and respect to all the students and professors of different eras of the university
- . Maintaining and promoting the credibility and protection of public trust in Kadman
- . Maintaining the general considerations of Kadman and prioritizing them over individual considerations
- . Strive to improve professional competence and share it with other members

. Adhering to the standards of professional conduct, laws and regulations and encouraging others to comply with them

B) Professional behavior criteria:

- . Knowledge of the laws, regulations and rules governing various areas of Kadman's activities
- . Maintaining independence and neutrality in Kadman's professional activities
- . Non-distortion and presentation of false information and presentation of correct, accurate, complete and fair information and reports
- . Avoiding unprofessional behavior and avoiding fraud, deception, abuse and any actions contrary to Kadman's professional reputation.
- . Healthy competition along with respect, fairness and avoiding any unhealthy actions such as destruction and bad advertising
- . Effort and perseverance in carrying out Kadman's professional activities
- . Clear maintenance of records and documents
- . Continuous monitoring to identify and prevent any violation of ethical principles, requirements of professional conduct, laws and regulations
